

## ***Math Surrounds Us!*** ***@ Home Activities***

Dear Parents:

We are very excited to have your child have meaningful conversations at home about math!

Attached is a calendar of weekly activities that will make math discussion and conversation easy.

Please try these out! Your children will amaze you with their math knowledge.

Here are two foundational questions that can really promote conversation with your children: **What do you see? What do you notice?**

If you'd like...we'd LOVE to see your math in action! Bring evidence (i.e. picture, drawing, etc.) of your math exploration and we'll display it on the *Math Surrounds Us!* bulletin board!

Mathematically yours,  
*The Lamphere Elementary Teachers*
